- Search and attraction of new customers
and partners

Summary

Working on various university projects, such as creating websites, small games and programs, telegram bots and intelligent 3D printer with the introduction of artificial intelligence, I was able to improve my knowledge gained in lectures. In addition, the skills gained from work experience, such as accuracy and punctuality, gave me the ability to work effectively as a team and control the workflow. Combining the above skills, I believe that I can help improve the company's effectiveness.
